

Kangping Chen

Hometown: Tianshui, Gansu Date of Birth: September 1996
Email: chenkp@lut.edu.cn
Phone: 17693127958

Education

2015.09-2019.06	◆ Lanzhou University of Technology	B.Eng., Measurement and Control Technology
2022.09-2025.06	◆ Lanzhou University of Technology	M.Eng., Computer Technology
2025.09-Present	◆ Lanzhou University of Technology	Ph.D. Candidate, Manufacturing Informatization

Research

- ❖ **Doctoral Research: Interpretable Knowledge Distillation, Multimodal Fusion, and Heterogeneous Knowledge Transfer**
Researches the stability and trustworthiness of representation distillation across heterogeneous neural networks, including cross-model alignment, interpretable knowledge extraction, and transfer of multi-source representations. Proposes a latent-space alignment method for heterogeneous representation distillation.
- ❖ **Master's Research: Knowledge Distillation and Model Lightweighting**
Studied knowledge-distillation-based compression for CNN image classifiers. Proposed collaborative multi-knowledge distillation combining representation and logit transfer, and enabled deployment through computation-graph optimization and inference-engine acceleration.

Grants

- 2026.01-2027.01 Gansu Haizhi Program: Application of Ante-hoc Explainable Deep Learning in Clinical Diagnosis (Student Researcher)
- 2025.01-2027.12 Gansu Provincial Key R&D Program - International Cooperation: Deep-Learning-Based Precision Classification of Pan-Cancer Subtypes Using Clinical, Pathological, and Genomic Data (Student Researcher)

Projects

- 2023.07-2023.12 Libm Mathematical Library Development (Technical Lead)
Developed remainder, remquo, annuity, and lgamma functions across float, double, and long double precision, delivering 12 interfaces. Managed source code, vulnerability reviews, the build and testing framework, and acceptance documentation.
- 2025.03-2025.09 Gansu Provincial Hospital of Traditional Chinese Medicine - Deep-Learning-Driven Clinical Decision Support System for Limb Salvage (Technical Lead)
Built a multi-turn conversational agent using general-purpose large language models and retrieval-augmented generation (RAG) for diagnostic decision support. Designed the agent workflow and optimized prompts.

Employment

- 2020.02-2021.07 Hangzhou PAX Computer Embedded Software Engineer
Researched and developed software-update functionality for payment terminals.
- 2021.08-2022.07 Hangzhou Yunjian Information Technology Embedded Software Engineer
Developed drivers for server baseboard management controller (BMC) systems.

Service

Reviewer for IEEE Transactions on Neural Networks and Learning Systems, Neural Networks, and Neurocomputing.

Profile

Committed to scientific research, with strong learning ability and intellectual curiosity. Able to adapt quickly to new research environments and tasks. Conscientious, rigorous, detail-oriented, and committed to integrity, responsibility, and teamwork.
